

HELP US CARE FOR YOUR CHILD'S INTRAVENOUS CANNULA

An Intravenous Cannula

A cannula is a small plastic tube that is inserted into a vein to give medication or fluid to your child. It can also be called a Freddie, a line or drip

Please tell your nurse if you notice.....

- Any swelling around the Cannula
- Any redness around the Cannula
- Any leakage around the Cannula
- If pump alarms
- Any sign of discomfort

Please do not.....

- Get Wet
- Pull on line
